Yoann **Piétri**

PhD Student

LIP6 - Sorbonne Université, Paris

+33 6 51 00 27 21 | Yoann.Pietri@lip6.fr | nanoy.fr | nanoy42

Research activities

Research interests

Continuous-Variable Quantum Key Distribution, Photonic Integrated Circuits for quantum applications, quantum communication infrastructures and networks, quantum cryptography beyond Quantum Key Distribution, overall integration of quantum communication systems, energetics of quantum information, practical security of Quantum Key Distribution.

Research projects

Open source software for CV-QKD (2021-2024): programmation of a python software for experimental CV-QKD, including hardware control, advanced signal processing techniques, parameter estimation, secret key rate computation and classical communication. The software is highly modular, hardware-agnostic and has extensive documentation. It has been benchmarked with emulated distances, fiber spool and deployed fiber at metropolitan distances. This was done in the context of the QSNP project and led to the scientific publication [4]. It is now used for investigation of side-channel attacks and free space communications.

Integrated devices for CV-QKD (2021-2024): characterization and usage of a Si integrated receiver performing heterodyne dual-quadrature detection for CV-QKD. Benchmarked with emulated metropolitan distances. Led to the publication of [3]. Characterization of an InP-based phase-diverse dual quadrature receiver. Involved in the project of an InP-based transmitter (see [1]). This was done in the context of the QNSP project. Participated in the design of new integrated devices that are now expected in the QNSP project.

Quantum Communication Infrastructure (2021-2024): installation and characterization of fibers in the Paris region linking 8 nodes (total distance of around 200 km). Benchmark of the infrastructure with commercial QKD systems and implementation of a trusted node experiment with added security. This was part of the ParisRegionQCI and FranceQCI projects. A publication is in preparation [8].

Energetic Analysis of Quantum Communication Protocols (2024): introduction of two new metrics for estimating the energetic cost of quantum communication protocols (in particular QKD). Application to the case of DV-QKD protocols (BB84, E91, MDI) and CV-QKD (GMCS and DMCS), and extension to CKA protocols leading to the first analysis of this kind. Led to the publication [5].

Education

PhD in Physics

Paris, France

Sorbonne Université

2021–Current

- System Integration of High-Performance Continuous-Variable Quantum Key Distribution,
- Supervised by Amine Rhouni and Eleni Diamanti,
- Defended on 09/12/2024 in front of the following Jury:
  - Tobias Gehring, Associate Professor at DTU,
  - Christoph Marquardt, Professor at FAU,
  - Ségolène Olivier, Researcher at CEA,
  - Valentina Parigi, Professor at Sorbonne Université,
  - Amine Rhouni, Research Engineer at CNRS,
  - Eleni Diamanti, Research Director at CNRS.

MsC in Physics

London, United Kingdom

Imperial College London

2020

- Title: Quantum Fields and Fundamental Forces,
- Master thesis (title: Quantum Cryptography) supervised by Jonathan Halliwell,
- Master awarded with Distinction on 01/12/2020.

Engineering diploma

Metz, France

CentraleSupélec - Cursus Supélec

2017 – 2021

- Third year of specialization replaced by an international Master program,
- Engineering diploma awarded on 09/07/2021.

"Quantum Key Distribution with Efficient Post-Quantum Cryptography-Secured Trusted Node on a Quantum Network".

Scientific Conferences

Invited Talks

Workshop Synchonisation de précision et réseaux — *Villetaneuse, France*, *October 2024*
QOSST: An Open Source Software for Continuous-Variable Quantum Key Distribution

Contributed Talks

Second Quantum Energy Initiative Workshop — *Grenoble, France*, *January 2025*
Energetic Analysis of Emerging Quantum Communication Protocols
Presented by Raja Yehia

Quantum Optical 2.0 Conference and Exhibition — *Rotterdam, Netherlands*, *June 2024*
QOSST: A Highly Modular Open Source Platform for Continuous-Variable Quantum Key Distribution Applications

1st Colloquium GDR TeQ "Quantum Techologies" — *Montpellier, France*, *November 2023*
Development of industrial continuous-variable quantum key distribution systems
Presented by Manon Huguenot

23rd International Conference on Transparent Optical Networks (ICTON) — *Bucharest, Romania*, *July 2023*
High-Speed Continuous-Variable Quantum Key Distribution With Advanced Digital Signal Processing
Presented by Matteo Schiavon

Optical Fiber Communication Conference (OFC) — *San Diego, USA*, *Mars 2023*
CV-QKD Receiver Platform Based On A Silicon Photonic Integrated Circuit

Optical Fiber Communication Conference (OFC) — *San Diego, USA*, *Mars 2023*
InP-based CV-QKD PIC Transmitter
Presented by Jennifer Aldama

International Conference on Integrated Quantum Photonics (ICIQP) — *Lyngby, Denmark*
A Versatile PIC-based CV-QKD receiver — *October 2022*

Poster Presentations

2nd Colloquium GDR TeQ Quantum Technologies — *Paris, France*
QOSST : A Highly Modular Open Source Software for Continuous-Variable Quantum Key Distribution — *November 2024*

14th International Conference on Quantum Cryptography (QCRYPT) — *Vigo, Spain*
Post-Quantum Cryptographically-Secured Trusted Node for Quantum Key Distribution in a Deployed Network — *September 2024*

6th Seefeld Workshop on Quantum Information, Seefeld, Austria (2024) — *Seefeld, Austria*
Post-Quantum Cryptographically-Secured Trusted Node for Quantum Key Distribution in a Deployed Network — *June 2024*
Presented by Verena Yacoub

1st Colloquium GDR TeQ "Quantum Techologies" — *Montpellier, France*
Experimental Demonstration of Continuous-Variable Quantum Key Distribution with a Photonic Integrated Receiver and Modular Software — *November 2023*

13th Colloquium on Quantum Engineering, Fundamental Aspects to Applications — *Palaiseau, France*
CV-QKD Receiver Platform Based On A Silicon Photonic Chip — *November 2022*

12th International Conference on Quantum Cryptography (QCRYPT) — *Taiwan, Taiwan*
ParisRegionQCI: A Parisian Quantum Network — *August 2022*

12th International Conference on Quantum Cryptography (QCRYPT) — *Taiwan, Taiwan*
A Versatile PIC-based CV-QKD Receiver — *August 2022*

International Conference on Quantum Communication, Measurement and Computing (QCMC) — *Lisbon, Portugal*
A Versatile CV-QKD system with a PIC-based Receiver — *July 2022*

12th Colloquium on Quantum Engineering, Fundamental Aspects to Applications — *Lyon, France*
A Versatile and High-Performance PIC-based CV-QKD Receiver — *November 2021*

Seminars

Cryptography in a Quantum World - Paris Rally — *Paris, France*
Experimental Quantum Cryptography at LIP6 — *May 2024*

Qontinuous Variable Days — *Paris, France*
Experimental Verification of Boson Sampling — *May 2024*

QURIOSITY Seminar at Telecom Paris — *Palaiseau, France*
Experimental Continuous-Variable Quantum Key Distribution in LIP6: open source software, integrated photonics and deployed networks — *Mars 2024*

Quantum Future group Seminar at UniPadova — *Padova, Italy*
High speed Quantum Key Distribution with Continuous Variable: System, Integrated Devices and Quantum Network in Paris — *May 2023*

Supervision

Internships

2024	**Tom Guerinel**, M1 Internship, *Study of Hybrid Quantum Key Distribution Systems*	*Co-supervised at 60%*
2024	**Salomé Perrin**, M1 Internship, *Implementation of a BB84 pedagogical demonstrator*	*Co-supervised at 80%*
2024	**Thomas Liege**, Master Thesis, *Study and optimization of Quantum Key Distribution devices on an optical link simulating atmospheric disturbances.*	*Co-supervised at 30%*
2024	**Sarah Layani**, M1 Internship, *Experimental Quantum Key Distribution: Techniques and Applications*	*Co-supervised at 80%*
2023	**Nessim Dridi**, M1 Internship, *Real Time Calibration for Continuous-Variable Quantum Key Distribution*	*Co-supervised at 20%*
2022	**George Crisan**, M2 Internship, *Post Processing of Continuous-Variable Quantum Key Distribution*	*Co-supervised at 80%*

Research projects

2024	**Émilie Gillet**, M1 Research Project, *Optimization of Digital Signal Processing algorithms for Continuous-Variable Quantum Key Distribution*	

Reviewing activities

Referee for the following journals/conferences: Quantum, Journal of Lightwave Technology (JTL), Physical Review Applied, Photonics Research, New Journal of Physics (NJP), QIP, Optics Communications, Quantum Science and Technology (QST), Optics Express, IEEE Photonics.

Teaching

Teaching summary: 226h total (6h lectures, 220h tutorials). L1 and M2, including Mathematics, programming (C, Python) and Quantum Cryptography at Sorbonne Université.

Lecture (4h), Tutorial (14h) — *Sorbonne Université, France*
MU5INQ02, Quantum Cryptography, M2 — *2024*

Tutorial (38.5h) — *Sorbonne Université, France*
LU1IN002, Éléments de programmation 2, L1 — *2024*

Lecture (2h), Tutorial (16h) — *Sorbonne Université, France*
MU5INQ02, Quantum Cryptography, M2 — *2023*

Tutorial (38.5h) — *Sorbonne Université, France*
LU1IN002, Éléments de programmation 2, L1 — *2023*

Tutorial (36h) — *Sorbonne Université, France*
P1.LU1MA011, Mathématiques pour les études scientifiques, L1 — *2022*

Tutorial (38.5h) — *Sorbonne Université, France*
LU1IN001, Éléments de programmation 1, L1 — *2022*

Tutorial (38.5h) — *Sorbonne Université, France*
LU1IN002, Éléments de programmation 2, L1 — *2022*

Outreach

2024	**Fête de la Science**, French national Science fair	*Sorbonne Université*
2023	**Fête de la Science**, French national Science fair	*Sorbonne Université*
2022	**Fête de la Science**, French national Science fair	*Sorbonne Université*
2022	**Creation of an animated vulgarization video**, On the subject of entanglement	*QICS*
2022	**Quantum vulgarization talk**, at FedeRez, national Federation of student network organisations	*Lille, France*
2021	**Fête de la Science**, French national Science fair	*Sorbonne Université*
2021	**Quantum vulgarization talk**, at FedeRez, national Federation of student network organisations	*Saclay, France*

Open Source work

QEnergy — *2024*
Software to estimate the energetic consumption of quantum communication protocols
https://github.com/RajaYehia/QEnergy

QOSST: Quantum Open Source Software for Secure Transmissions — *2024*
Open Source Software for Experimental Continuous-Variable Quantum Key Distribution
https://github.com/qosst/

etsi-qkd-014-client — *2022*
Python client of the ETSI QKD 014 client
https://github.com/nanoy42/etsi-qkd-014-client

Responsibilities

2021-2024 **Participation to the organization of the QI team group yearly workshop**
2021-2022 **Organizer of group seminars in the QI Team of LIP6**
2021-2022 **Website manager the QI Team of LIP6**, Including creation of the website, https://qi.lip6.fr

Languages

Spoken languages: French (native), English (fluent), Spanish (elementary), German (beginner).

Programming languages: Python (advanced), C (intermediate), Julia (beginner).
